## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 73-75 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In re claims 73 and 74, the word, “stuffed” is vague and indefinite.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 73-75, as best understood are rejected under 35 U.S.C. 102(e) as being anticipated by Wu (U.S. Patent No. 6,281,542).

In re claim 73, Wu (Fig. 3) discloses a semiconductor device, comprising:

A substrate (103); and

A conductive layer (113a) over said substrate and having a surface stuffed with a non-oxygen material.

In re claim 74, Wu discloses the device of claim 73, wherein said surface is a nitrogen-stuffed surface.

In re claim 75, Wu discloses the device of claim 74, wherein said surface is contacting an oxygen molecule (115; TEOS-oxide; column 4, lines 27-28).

### *Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lee et al. (U.S. Patent No. 6,255,688) and Kirlin et al. (U.S. Patent No. 6,320,213) disclose similar structures to that of the claimed invention.
